DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fleming USPN 3,777,931.

Fleming discloses a dispensing comprising:

"a cassette fixed removably to the dispensing device" (10 figure 2). "pushing means" (28 figure 2). "a cover" (60 figure 2). "a stopping/receiving part" (44 figure 2). "pushing means including ... abutting part (26 figure 2) ... biasing part (40 figure 2) ... stopping part" (52 figure 2). "stopping at the stopping/receiving part of the cassette only when the cover is opened" (figure 2).

Fleming does not disclose a dispensing device body or that the dispensed item is medicine.

Examiner takes official notice that the dispenser could dispense medicated wipes and be included in a more complex dispensing device.

It would be obvious to one skilled in the art to modify Fleming to be housed in a dispensing device and dispensing medicated wipes, because this expands the usefulness of the original invention.

Allowable Subject Matter

Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
